Operations Analyst · Compliance Analyst · Quality Assurance · Data/Program Specialist

QUICK INTRO (Executive Summary)

Operations and Compliance professional with 20+ years of experience in government, federal contracting, and regulated environments. I manage high-volume workflows with a focus on accuracy, audit readiness, and operational stability. I strengthen data integrity, support reliable reporting, and improve process consistency through structured validation and SOPs.

VALUE HIGHLIGHTS (Quantifiable Impact)

Scale & Accuracy: 7,500+ Medicaid cases in IES with 98%+ audit accuracy.

Risk Mitigation: Recovered a stalled \$650K federal contract through compliance remediation.

Efficiency: Reduced rework by 20% through systematic workflow standardization.

Leadership: Served as SME/Lead; trained staff on complex regulatory scenarios.

CORE STRENGTHS (Skill Groupings)

Process Improvement & QA: Workflow analysis, SOPs, standardization, process refinement.

Compliance & Data Integrity: Regulatory adherence, audit readiness, validation logic, error reduction.

Operations Management: High-volume case management, operational stability, and workflow oversight.

PEER RECOGNITION (LinkedIn Recommendations)

- Commended for streamlining workflows and improving team productivity through practical solutions.
- Valued as a resource for resolving complex operational challenges under pressure.
- Praised for delivering accurate analysis in a high-volume federal benefits environment.
- Recognized for leadership, communication, and project execution across 10+ years.

GITHUB PROJECTS (Operational Application Showcase)

Eligibility Case Review Tracker: Rule-based Python/Excel tools to flag missing or invalid case data.

Compliance Audit Dashboard: SQL framework for audit preparation and relational data integrity tracking.

SOP Generator Tool: Built structured processes to standardize documentation and enforce process creation.

Data Validation Script: Python/Excel checks to detect missing values, duplicates, and formatting issues.

TOOLS AND TRAINING (Technical Competencies)

Tools: Excel, SQL, Python (AI-assisted validation/reporting), Office 365, SharePoint.

Development: Google Prompting Essentials (Coursera) - AI-assisted workflows and operational productivity.

Cloud/Security: AWS Cloud Foundations coursework - Compliance Architecture, Security Governance.
